EDUCATION

Thapar Institute of Engineering & Technology, Patiala

Aug 2024 – May 2028

B.Tech in Computer Science & Engineering | CGPA: 8.15

Relevant Coursework: Data Structures & Algorithms, OOP (C++), Operating Systems, Computer Networks, Database Management Systems, Artificial Intelligence

TECHNICAL SKILLS

Languages: C, C++, JavaScript, TypeScript

Backend: Node.js, Express.js, REST APIs

Frontend: Next.js, React

Databases: PostgreSQL, Redis, MySQL

Core CS: Object Oriented Programming, Operating Systems, DBMS, Computer Networks

Tools: Git, GitHub, VS Code

PROJECTS

URL Shortener with Analytics

2026 – Present

Node.js, Next.js, PostgreSQL, Redis

- Built a full stack URL shortener with custom short codes, click tracking, and per-link analytics dashboard
- Designed a RESTful API with Node.js and Express.js handling redirection, link creation, and analytics endpoints
- Used PostgreSQL for persistent storage of links and click events; integrated Redis for caching hot URLs to reduce DB load
- Built a Next.js frontend with an analytics dashboard showing click counts, referrers, and geographic breakdown

DSA Solutions Repository

github.com/arnav230/DSA-Solutions | C++

- 55+ curated LeetCode solutions in C++ organized by topic, selected from 280+ problems solved
- Covers Arrays, Sorting, Linked Lists, Stacks & Queues, Binary Search, Binary Trees, BST, Graphs, Greedy, Bit Manipulation

EXPERIENCE & HACKATHONS

Create & Conquer Hackathon — in collaboration with Labeller AI

Apr 2026

Thapar Institute of Engineering & Technology

- Built a data labelling pipeline for raw video data to enable robot training using supervised learning
- Collaborated in a team to design and implement the end-to-end annotation workflow

CODING PROFILE

-
- Solved 280+ DSA problems on LeetCode
 - Earned the 50 Days Badge (2026) on LeetCode for consistent daily problem solving
 - Completed Sorting, Arrays, and Stack & Queues modules; strong progress in Linked Lists, Binary Trees, BST, Graphs, Binary Search, Strings, Bit Manipulation, and Greedy Algorithms
